routes/main.js

```

1  const router = require('express').Router()
2  //Doesn't depend on any controllers. It is self contained
3
4
5  /* Added the controller for the routes */
6  // const express = require("express")
7  // const router = express.Router()
8  // const authController = require('../controllers/auth')
9  // const homeController = require('../controllers/home')
10 // const postsController = require('../controllers/posts')
11 ///////////////////////////////////////////////////
12
13 router.get('/', (request, response) => {
14   console.log('/')
15   response.render('index', {posts: undefined})
16 })
17
18 router.get('/login', (request, response) => {
19   console.log('/login')
20   response.render('login')
21 })
22
23 router.get('/signup', (request, response) => {
24   console.log('/signup')
25   response.render('signup')
26 })
27
28 router.post('/login' , (request, response) => {
29   console.log(request.body.email, request.body.password)
30   response.render('index', {posts: undefined})
31   //render /profile

```
